Netflix, Inc. (NFLX)

Watch list analysis, 2026-11-05 20:52 CET. Latest prices on 2026-11-05. Claude's notes updated 2026-11-05.

1. Summary

> **The leading streaming business, now at its lowest valuation in a decade after a run of soft guidance, while adjusted earnings still grow about 15% a year. View: a first look, not a full analysis yet. The proposed entry is 20x adjusted earnings, about $58.**

Price	Adjusted P/E, 12m	10-year median P/E	Entry at 20x
$65.25	**22.3x**	**61.3x**	**$58.40** 10% below today's price

- **Cheap:** about 22x adjusted earnings, against a 5-year median of about 34x.
- **Strong:** large and growing free cash flow (about $12bn guided for 2026) and modest debt.
- **Weak:** guidance has disappointed three quarters running, and the advertising business is behind plan.
- **Uncertain:** how much of the slowdown is lasting, and what the new content chief and job cuts change.

2. The numbers

Absolute values, latest 12 months

3. Analysis

Adjusted P/E against its own 10-year history

Year	Average price	Adjusted EPS	P/E
Now (12m)	**$65.25**	**$2.92**	**22.3x**
2025	$109.71	$2.67	41.1x
2024	$67.15	$1.99	33.7x
2023	$39.02	$1.20	32.5x
2022	$28.46	$0.99	28.8x
2021	$55.82	$1.13	49.4x
2020	$44.68	$0.61	73.3x
2019	$32.89	$0.42	78.3x
2018	$31.93	$0.27	118.3x
2017	$16.54	$0.13	127.2x
2016	$10.20	$0.05	204.1x

Median of the yearly P/E: 61.3x over 10 years, 33.7x over the last 5.

Adjusted EPS: Yahoo's reported quarterly EPS (the basis analysts use, without amortization and one-offs), split-adjusted. Last four quarters, by report date: Jan 2026 $0.56, Apr 2026 $0.69, Jul 2026 $0.80, Oct 2026 $0.87. Full-year EPS is the trailing figure at the Q4 report; P/E uses the year's average price. The chart shows the daily price over the trailing adjusted EPS known that day. The 2025-10-21 quarter uses $0.73: excludes the Brazilian tax charge of about $619m (about $0.14 a share). The 2026-04-16 quarter uses $0.69: excludes the $2.8bn Warner Bros. Discovery termination fee (about $0.54 a share after an estimated 18% tax); Claude's estimate.

Entry price

At 20x trailing adjusted EPS of $2.92, the entry price is **$58.40**, 10% below today's price. The 10-year range of yearly P/E is 28.8x to 204.1x (years of collapsed earnings, such as 2020, show very high P/Es). Next report 2027-01-19 (EPS estimate $0.68); if met, the entry price becomes $60.80.

Target: Proposed 2026-10-27, not yet confirmed by Babak: the 10-year median (about 60x) reflects Netflix's early hyper-growth years, so the target is set against the last five years (about 34x median, 29x low), discounted for slower growth now.

Business

Netflix is the largest paid streaming service, earning almost all its revenue from subscriptions, with a growing advertising tier. Q3 2026 revenue was about $12.9bn, up about 12% a year, with EPS of $0.87 against a $0.82 estimate. The stock split 10-for-1 in November 2025. Its failed bid for Warner Bros. Discovery's studios and streaming business left it with a $2.8bn termination fee in Q1 2026, which the adjusted EPS here leaves out.

Risks

- **Slowing growth:** full-year 2026 revenue was trimmed to about $51.1bn, and Q4 EPS guidance of $0.67 is below the $0.73 consensus.
- **Advertising:** the 2026 ad revenue forecast was cut from about $3bn to $2.7bn because of delays in ad product features.
- **Costs:** about 1,000 job cuts (about 6%) will reduce the Q4 operating margin by about 1.2 points.
- **Competition** for viewing time from YouTube, short video and the combined Paramount–Warner Bros.

News

- 2026-11-05: about $65.2 (intraday), down about 2% in the market sell-off; no company news.
- 2026-11-04: about $66.5 (intraday), up about 5% with the market; no company news.
- 2026-11-02: about $62.6 (intraday: since the US clocks changed on Nov 1, Wall Street closes at 22:00 Italy time, after this run), little changed; no company news.
- 2026-10-30: about $62.1, about 6% above the $58 entry; steady while the Nasdaq fell about 3%. No new company news.
- 2026-10-28: about $61.9, drifting lower; about 6% above the $58 entry. No new company news.
- 2026-10-26/27: the stock broke below $65 and closed about $62.6 after a Bloomberg report that viewers spend less time on the service; Huatai downgraded it to Hold.
- 2026-10-20: Q3 results beat on EPS, but soft Q4 guidance sent the stock down about 6% after hours. Free cash flow guidance was lowered to about $12bn, mainly because of a real-estate transaction.
- Peter Rice, formerly of Disney and Fox, was named Chief Content Officer.
- 2026-04-16: Q1 EPS of $1.23 included the $2.8bn WBD termination fee; Netflix authorised a $25bn buyback.

What to watch

- Q4 results around Jan 19, 2027, and the 2027 outlook for revenue, margin and advertising.
- Whether subscriber engagement holds after the price increases.
- How the buyback is used at these prices.

Caveats

- Yahoo data is unofficial; capex can include acquisitions or stakes, so check SEC capex.
- The peer group is hand-picked, so the weighted scores depend on it.
- Claude's notes are dated above and may be older than the numbers.
