Alphabet Inc. (GOOGL)

Watch list analysis, 2026-11-12 21:32 CET. Latest prices on 2026-11-12. Claude's notes updated 2026-11-12.

1. Summary

> **The business is the strongest it has been in years (revenue +25%, Google Cloud +103% in Q3), but the stock is not cheap. The GAAP P/E near 15x is an illusion: much of the last year's earnings are paper gains on the Anthropic and SpaceX stakes. On core earnings, with the stakes (about $15 a share after tax) taken out of the price, Alphabet trades at about 26x, above its 10-year median of about 24x. View (report 17): wait, and buy below about $256 (22x core EPS plus the stakes), about 14% below today.**

Price	Adjusted P/E, 12m	10-year median P/E	Entry at 22x
$299.43	**26.0x**	**23.7x**	**$255.83** 15% below today's price

- **Cheap:** not now; about 24x core earnings once the stakes are taken out of the price, in line with its 10-year median.
- **Strong:** about $240bn of cash against about $113bn of debt, revenue up about 25% and an operating margin near 32%.
- **Weak:** capital spending of about $130bn a year has turned the quarterly free cash flow margin negative (about -7% in Q3).
- **Uncertain:** whether AI search answers erode Search (still about half of revenue), and the size and value of the SpaceX and other private stakes that swing reported EPS.

2. The numbers

3. Analysis

Adjusted P/E against its own 10-year history

Year	Average price	Adjusted EPS	P/E
Now (12m)	**$299.43**	**$10.95**	**26.0x**
2025	$210.89	$10.66	19.8x
2024	$163.81	$8.05	20.3x
2023	$118.79	$5.80	20.5x
2022	$114.76	$4.55	25.2x
2021	$124.22	$5.60	22.2x
2020	$73.95	$2.94	25.2x
2019	$59.56	$2.59	23.0x
2018	$56.10	$1.99	28.2x
2017	$46.99	$1.72	27.3x
2016	$38.16	$1.56	24.5x

Median of the yearly P/E: 23.7x over 10 years, 20.5x over the last 5.

Adjusted EPS: Yahoo's reported quarterly EPS (the basis analysts use, without amortization and one-offs), split-adjusted. Last four quarters, by report date: Feb 2026 $2.67, Apr 2026 $2.76, Jul 2026 $2.85, Oct 2026 $2.67. Full-year EPS is the trailing figure at the Q4 report; P/E uses the year's average price. The chart shows the daily price over the trailing adjusted EPS known that day. The 2026-02-04 quarter uses $2.67: excludes the $2.3bn gain on equity securities ($0.15 a share, Alphabet's figure). The 2026-04-29 quarter uses $2.76: excludes the $36.9bn gain on equity securities ($2.35 a share, Alphabet's figure). The 2026-07-22 quarter uses $2.85: excludes the $99.0bn gain on equity securities, mainly SpaceX ($6.26 a share, Alphabet's figure). The 2026-10-28 quarter uses $2.67: excludes the $8.7bn loss on equity securities ($0.55 a share, Alphabet's figure).

Entry price

At 22x trailing adjusted EPS of $10.95 plus $14.93 a share of equity stakes (kept out of the P/E), the entry price is **$255.83**, 15% below today's price. The 10-year range of yearly P/E is 19.8x to 28.2x (years of collapsed earnings, such as 2020, show very high P/Es). Next report 2027-02-03 (EPS estimate $3.20); if met, the entry price becomes $267.49.

Target: Report 17 (2026-10-29), not yet confirmed by Babak: 22x core EPS ex-stakes, the 2023-2025 level with a discount for the capex and the dilution; the after-tax equity stakes (Anthropic, SpaceX, others: $14.93 a share at 30 Sep 2026) are added back, so the entry is about $259.

Business

Alphabet owns Google Search and advertising, YouTube, Google Cloud, Android and Waymo. Q3 2026 revenue was about $127.6bn, up about 25% a year, in line with estimates; Search grew about 12%. Reported EPS swings with the marked value of its equity stakes (mainly SpaceX): gains added $2.35 a share in Q1 2026 and $6.26 in Q2, and a loss

took $0.55 off Q3. The adjusted EPS here leaves those out (see `eps_override` in the config), so the trailing figure is about $10.95, not Yahoo's $19.16. Following report 17, the after-tax value of the stakes ($14.93 a share at 30 September: Anthropic at its last round, SpaceX, other listed stakes) is also taken out of the price for the P/E and added back to the entry price.

Risks

- **Capital spending:** the AI build-out (data centres, chips) is at a record and may not earn its cost.
- **Search disruption:** AI chat assistants compete for the queries that carry Search's advertising.
- **Regulation:** US and EU antitrust cases over Search and advertising technology.
- **Earnings quality:** large unrealized gains and losses on private stakes make GAAP EPS noisy.

News

- 2026-11-12: about $299 (intraday), up about 3% since Nov 4 and close to $300. Its filing showed the $83.7bn SpaceX stake held and a new $0.5bn Qualcomm stake; a $15bn Malaysia data-centre plan (Nov 7); a class action filed (Nov 9) and a possible EU antitrust probe into news rankings in search. About 26x core earnings, 17% above the $256 entry.
- 2026-11-04: about $291.5 (intraday), up about 4.5% with the market; no company news.
- 2026-11-02: about $281 (intraday: since the US clocks changed on Nov 1, Wall Street closes at 22:00 Italy time, after this run), little changed; no company news. About 9% above the $256 entry.
- 2026-10-30: about $280 (-1.4%) as the Nasdaq fell about 3% on worries that AI spending will not pay off; a 52-week low is about $271. Wells Fargo cut its target from $417 to $371. Websites quoting a P/E near 14.5x use GAAP EPS, which includes the SpaceX gains; on adjusted EPS it is about 25.6x, or about 24x with the stakes taken out of the price.
- 2026-10-28: Q3 results: revenue in line, GAAP EPS of $2.12 against a $3.01 estimate after an $8.7bn loss on equity securities; free cash flow negative. The stock fell about 8% after hours, to about $300, and is about $286 today.
- 2026-07-22: Q2 EPS of $9.11 included a $99.0bn gain on equity securities, mainly SpaceX ($6.26 a share).
- 2026-04-29: Q1 EPS of $5.11 included a $36.9bn gain on equity securities ($2.35 a share).

What to watch

- Q4 results around Feb 3, 2027, and the 2027 capital spending guidance.
- Free cash flow: whether it turns positive again as the new capacity starts earning.
- Google Cloud growth and margin, and Search growth as AI answers spread.

Caveats

- Yahoo data is unofficial; capex can include acquisitions or stakes, so check SEC capex.
- The peer group is hand-picked, so the weighted scores depend on it.
- Claude's notes are dated above and may be older than the numbers.
